Approximately 34,000 pets are killed each year in our tri-state animal shelters. There are too many pets, not enough homes. We recommend getting your pet fixed at about 4 to 5 ½ months old. Pets may start spraying or get pregnant at about 6 months of age.

Here is a table to help you quickly understand the offering of the vets who are “in-Network”. All vets can “take” the voucher and I reimburse them \$25. **But the 5 vets below take the voucher and provide a significant discount to the customer for having the voucher. In some cases, the voucher is payment in full.**
